Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-25, drawn to an apparatus for aneurysm repair.

Group II, claim(s) 26-39, drawn to a system for repair of an aneurysm.

Group III, claim(s) 40-53, drawn to a method of treating an aneurysm.

Group IV, claim(s) 54-59, drawn to a system for repair of an aneurysm with a cuff.

Group V, claim(s) 60, drawn to a system for repair of an aneurysm with an extension cuff.

Group VI, claim(s) 61, drawn to a method of treating an aneurysm in a blood vessel.

The inventions listed as Groups I to VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: there is no special technical feature in that the tube with an expandable body containing a structure with a free end the deploys radially outwardly upon expansion was known to the art as demonstrated by US 6,287,335 (see Figures 11A to 12C) or by US 2002/0120338 (see paragraph [0084] and Figures 4 to 6).

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species Set 1

- A. Figure 1
- B. Figure 3
- C. Figure 6D
- D. Figure 6E
- E. Figure 6F
- G. Figure 6G
- H. Figure 11
- I. Figure 15
- J. Figure 16
- K. Figure 18
- L. Figure 19
- M. Figure 20

Species Set 2

Select one of Figures 6A to 6C for prosecution.

Species Set 3

Select one of Figure 7, 8, 9, and 10 for prosecution.

Applicant is required, in reply to this action, to elect a single species, **from each species set**, to which the claims shall be restricted, if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: none.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: there is no special technical feature in that the tube with an expandable body containing a structure with a free end the deploys radially outwardly upon expansion was known to the art as demonstrated by US 6,287,335 (see Figures 11A to 12C) or by US 2002/0120338 (see paragraph [0084] and Figures 4 to 6)..

Conclusion

Applicant should specifically point out the support for any amendments made to the disclosure, including the claims (MPEP 714.02 and 2163.06). Due to the procedure outlined in MPEP 2163.06 for interpreting claims, it is noted that other art may be applicable under 35 USC 102 or 35 USC 103(a) once the aforementioned issue(s) is/are addressed.

Applicant is respectfully requested to provide a list of all copending applications that set forth similar subject matter to the present claims. A copy of such copending claims is respectfully requested in response to this Office action if the application is not stored in image format (i.e. the IFW system) or published.
